Name _____

Identify each cell below as prokaryotic, plant cell, or animal cell, then identify the labeled parts:

Cell 1

Cell 1: _____
A: _____
B: _____
C: _____

Cell 2

Cell 2: _____
D: _____
E: _____
F: _____

Cell 3

Cell 3: _____
G: _____
H: _____
I: _____

Identify each statement as true or false (T or F):

- ____ 26. Inside small cells, materials and information can be transported to all parts of cells more quickly than larger cells.
- ____ 28. The cells of animals are prokaryotic.
- ____ 27. The nonpolar tails of a phospholipid are attracted to water.
- ____ 28. Most of a cell's ATP is produced in the mitochondria.
- ____ 29. The only difference between a plant and animal cell is that plant cells have chloroplasts.
- ____ 30. The mesh-like network of protein fibers that supports the shape of the cell is called a cytoskeleton.
- ____ 31. Only eukaryotic cells contain DNA.
- ____ 32. Cell surface marker proteins face the inside of the cell.

3RD GRADE SCIENCE

WHAT'S THE MATTER WITH YOU?

Can you tell if these are solids, liquids or gases?
Write your answers in the space provided.
(Find the answers at the bottom of the page.)

1. Milk	_____
2. Sand	_____
3. Helium	_____
4. Ice cube	_____
5. Paint	_____
6. Fish	_____
7. Gasoline	_____
8. Maple syrup	_____
9. Oxygen	_____
10. Oil	_____

© 2011 Knowledge Adventure, Inc. All rights reserved.

Science worksheet

What's the Matter?

Tell whether each is a solid, liquid, or gas.

1. Milk - _____	
2. Cookie - _____	
3. Oxygen - _____	
4. Fish - _____	
5. Pencil - _____	
6. Maple syrup - _____	
7. Shampoo - _____	
8. Carbon dioxide - _____	
9. Ice cube - _____	
10. Paint - _____	
11. Oil - _____	
12. Salt - _____	
13. Water vapor - _____	
14. Gasoline - _____	
15. Helium - _____	
16. Sand - _____	

How To Train Your Dragon © 2014 DreamWorks Animation LLC. All Rights Reserved.

fishandlearning.com

What Ocean Item Am I?

Name _____

For each picture, choose the word that best describes it.

 seal fish snail	 octopus tuna killer whale	 hammerhead swordfish penguin	 whale shrimp seahorse
 humpback orca starfish	 dory shark blue whale	 oyster clownfish crab	 lobster eel starfish
 clam orca barracuda	 dolphin mussel limpet	 larvae squid coral	 frog sailfish turtle
 sealion coral jellyfish	 sponge kelp barnacle	 shark eel seaweed	 narwhal sunfish porpoise

Layers of the Earth

Name _____, Date _____

Directions: Use the Word Bank to label the layers of the Earth.

Word Bank	
Inner Core	Crust
Mantle	Outer Core

Word Scramble: Use the clues to unscramble the bold word and write it correctly on the line.

- _____ **EUPTANSEN** water that is not salty and found inland.
- _____ **TRCSU** Layer of the Earth we live, where all landforms are found.
- _____ **ESCNTTVOUCRE** forces that build-up the Earth's surface.
- _____ **EECTSRBYUAC** forces that breakdown the Earth's surface.
- _____ **DOSUAFRN** are always changing due to water, wind, and living things.
- _____ **PLATE CCNVTSEIT** is the theory that giant plates of rock are floating on the Mantle layer, and are moving slowly across Earth's surface.

Constructed Response: Explain why the Earth's surface looks much different now, than it did millions of years ago.

We look at the study of matter. Meet some of the most primitive and complex organisms on the planet. Science is a daunting subject even for intelligent students. Because the Earth axis is tilted it has huge consequences for all parts of the planet. You have five of them to help you complete these worksheets. This is really informative for students. Here are eight secrets on how to study science effectively. You don't need to spend hours in libraries or wait on a book. These magnificent creatures of the past provide a huge wonder in all of us. How do body cells and sex cells make copy of themselves? Learn how to maintain your health through basic body care. Children love to know how and why things work, and science is part of everything, from animals and earthquakes to the human body. Gives plants and algae food. Seven Tips To Improve In Science At School 1. Just like scientists work as a team to discover a scientific phenomenon, you can study as a team to interpret it. Reference materials for every chapter can help give you information about the subject matter and show its advancements. A breakthrough that shows how elements have likenesses and differences. Often overlooked, this is how we collect data that will help us better understand what we are examining. Do you know how to identify the feelings of others? A great look at the middle and high school level of this Acids and Bases. We use this to better understand landforms. For example, a series of diagrams of a chromatograph to identify dyes in a mixture can help you visualize the framework behind the movement of the solvents. Don't think I'd move much if I could make my own pizza without doing so. Those amazing super computers sitting in our pockets right now. We try to help kids develop a better understanding of scientific vocabulary and the world around them. Explore the biology behind our friends that we spend some much time with. Plus, they offer adult coloring pages, which are also great for kids who are into more challenging coloring pages. In addition, the website has educational pages to teach kids about states, plants, animals and more things of interest. Fisher-Price if you have toddlers who love to color, check out the Fisher-Price website for coloring pages that you can print. It's probably important to know we can do it best and how to stay safe doing it. What is in your DNA? We look at questions that many school-aged children have on their minds. The organism that doesn't move much, if ever, but can make their own food. Many of the animals who call the ocean home are very unusual looking. Other unforgettable fan favorites like The Lord of the Rings and Star Wars are also available for free coloring. Check out Coloring.ws for all the latest in free printable coloring pages. You would be amazed by some of the animals that can take flight. Learn from diagrams. Diagrams are the visual representation of a topic. Did you know that over half of the world's plant and animal species live in rainforest areas, but rainforest only covers 2% of the Earth surface area? Why not learn about things that are out of this world? Kids love learning about the creatures they can find in their own backyard. An important skill in many disciplines, but we specifically focus on how graphing can be used to help you solve problems. Study general science principles—that people use every day, often without even realizing it—such as how magnets work, the basics of Newton's laws of motion, and the workings of simple machines. Plus, they offer color-by-number pages, connect-the-dots and channel mazes to keep your little ones entertained. Schedule a field trip to a beekeeper or visit a butterfly garden. Visit a zoo and learn about mammals, such as elephants (pachyderms), and reptiles, such as alligators and crocodiles. When cells begin to divide in an abnormal manner. Try it out with a study group. Group sessions with the right party can lead to successful outcomes. They have fun categories like emojis and fantasy. If so, visit a museum of natural history so that she can learn about dinosaurs. Plus, it's an easy way to celebrate each season or special holidays. Crayola Website When it comes to coloring, many people immediately think of Crayola crayons. We need to spend some time on understanding the planet we inhabit. Do you know how all organisms take in food? These aren't your everyday birds, in fact, there aren't many birds in here at all. The super small living things that are almost equally as helpful to humans as they are harmful. Science is usually a high-interest topic for kids. The fundamental approach to finding and determining the truth. Teach them to make a hypothesis (an educated guess) about what they think the result of the experiment will be and why. These are things that we often take for granted like rainbows. Updated by Kris Bales Habitats Word Search: Ocean Animals Habitats Word Search: Ocean Animals In which habitat could you find a blue whale, a squid, and a shark? Earth, space, planets, and the stars are fascinating to students of all ages. This section tries to answer some common questions that many have about the return of water to planet Earth. Then, capitalize on that interest with a set of free dinosaur printables. If your young students are fascinated by reptiles, print a reptiles coloring book for them. You may have a future paleontologist in your class or homeschool. We explore our nearest star. Take advantage of your student's fascination with science-themed topics by incorporating fun printables and hands-on learning activities into your science studies. It's never too early to begin teaching children to document their scientific lab findings. See how traits are passed on to offspring with this section. We take a look at those animals in this section. It gives us warmth. These worksheets explore outer space and the things spinning around it. Then, show them how to document the results with science report forms. Learn about the men and women behind today's science by using free worksheets, such as Albert Einstein printables, where students can learn about one of the most famous scientists of all time. We compared various phases of the same substances. Spend time outdoors creating your own rock collection and indoors learning about them with rocks printables. The treasures of Mother Earth affect life on the planet a great deal. There are tons of great resources for free printable color pages online. Get very detailed with your understanding of these great structures left all over the Earth. MORE FROM QUESTIONSANSWERED.NET Skip to main content Our grade 3 science worksheets delve deeper into concepts in life sciences, earth sciences and physical sciences. The revolutionaries who shaped the world and technology as we know it. We look at all the processes that are involved in recycling this vital element for living things. We explore all these different classifications of matter and explain the differences for you. It is easier to remember a formula once you have identified its use, such as the second law of Newton, which states force is equal to the mass times its acceleration, hence making it easier to understand the relation between two quantities. The exchange of ideas and information provides a healthy discussion session and makes you more confident. Newton's pesky laws come into play for the first time here. What are all the natural features of Earth? Go prepared for the class. Science is just like a Pandora's box. Habits that improve our overall health. The questions are so simple, but many of us have them. Oceanography is the study of the oceans and the creatures that live there. A look at the movement of light and the paths they take. Giving things proper names insures that we are all studying the same exact thing. 3. Peer tutoring If you want to test how much your memory retains a particular topic, you must opt for peer tutoring. A look at the function of many different parts in different members of the animal kingdom. Where does your food come from? Students can soar into the heavens with astronomy and space exploration printables. What are the key dynamics and physics behind oceans? Reading comprehension sheets to use with your reading in the content area courses. Students explore the use and function of Newton's Laws of Motion. We have all of the people that shaped history in a major way here in here including: Bell, Biro, Edison, Ginsburg, Ford, Gutenberg, Whitney, Morse, Ben Franklin, The Wright Brothers Investigate how energy is stored and active in all phases of motion. 4. 5. Try to work out the problems in a quiet room and have an uninterrupted homework session. These branches are not just branches; they are whole new dimensions. When compounds or mixtures come in contact with one another electron transfer can make a ton of different cool things happen. Explore all six layers of this collection of gases that helps keep living things safe and protected. The fundamental unit of all matter is explored in depth. Survey how different organisms make copies of themselves to keep their species going. 7. Discover the basic units of life. Investigate how living things interact and share an area of land. It is not just about the concepts that the scientists have passed down over the years. Grouping things is the first steps towards for classification. We explore the natural and some unnatural ecological changes to a community over time. Reference materials The internet is a wonderful invention; it has made school easier. Created by the sun and the heat shifts created by warming weather affects all of us every single day. Study the weather and natural disasters such as earthquakes or volcanoes. Help students learn about the mammals and fish that inhabit the oceans, including dolphins, whales, sharks, and seahorses, as well as: Crabs Jellyfish Manatees Octopuses Sea Turtles Starfish Then, dig deeper by exploring more facts about dolphins, seahorses, and even lobsters. Inspect all the layers of the past and what dead organisms and substances can tell us about that past. This allows you to look for coloring pages based on certain holidays and seasons. Just ColorJustColor.net offers a wide range of free printable coloring pages, which include fun categories that are hard to find elsewhere. When chaos strikes Earth, these are usually the culprits. What makes science so complex? And the movie-themed pages don't just end there. Look at how water changes form over the course of the planet. Explore the parts a function of all forms of electric circuits. Most concepts end up in the form of a formula. Spend some time exploring the tools of a scientist's trade, such as the parts of a microscope. We hope these points added to your study routine & will help you improve in science at school and make you fall in love with the subject. Studying science requires some extra tips and tricks, unlike other subjects. Scrutinize the top layer of the Earth's surface that provides home for animals and plant life. This includes topics from "Doodle Art," which are fun, creative drawings to "Art Coloring Pages," which gives you the chance to color in famous paintings by artists like Leonardo da Vinci and Claude Monet. There's also coloring pages from popular DreamWorks movies like Shrek and The Ice Age franchise. Learn more about our feathery friends. What are all the variables behind these natural disasters? Learn all about Luna our only natural satellite. These are the processes you need to know. The movement of current along a circuit is complex and can be used to our advantage. Keep your kids busy doing something fun and creative by printing out free coloring pages. It is a smart move to go to a class with questions that only arise once you have read about it. 6. It doesn't only boost your confidence in a subject, but also you have a good amount of credits to graduate early. It is a well-tested theory that more clarity about a subject is gained when someone teaches it. One the four main branches. Each class is essential since every concept is linked to one another. Includes: Sharks, Whales, Rays, Octopi, Dolphins, Jellyfish, Crabs, Coral, Seals, and Sea Turtles What lives in the ocean? The application of all areas that is used as a tool to reconstruct events. Don't run from formulas. Formulas are the basics of science, especially in physics and chemistry. We examine the chemistry, commercial, and common properties and applications of Hydrogen Dioxide. 2. Learn how we create most of the human food supply. Einstein, Galileo, Darwin, Newton, Hubble, Maxwell, Kepler, Pasteur, Dirac, and Fischer These machines have been used to help humans do work since the dawn of time. A good understanding is required for the reasoning behind each scientific theory makes a difference in your results. These offer basic outlines of many objects, which gives kids the chance to fill in the blank areas with their imagination. Teachers will also enjoy the "School" section, which is filled with education-related images to give out during class. Free Coloring Pages Freecoloringpages.com offers thousands of pages that you can print for free. It's fitting then, that they offer a large treasure trove of coloring pages for kids that you can print for free. Best of all, Crayola offers Disney-themed coloring pages. There are some animals that often slip our mind and we take for granted that are right in our backyards. And if you're looking for very simple coloring pages, check out their "Simple Shapes" category. The most extensive network ever put together changed how we communicate for ever. For instance, "Where do waves come from?" Learn how solute and solvents tend to interact when divided by a membrane. Everything is just one click away. These pages are more generic and aren't tied to any specific brands. These feature Little People, and you can easily find what you want thanks to the search function on the left column. The deeper you probe, the clearer the bigger picture gets. From fairies to scenes from popular movies, there's sure to be several pages that your kids will love. Spring is a great time to study the birds and the bees. Learn about the lepidopterists—scientists who study moths and butterflies—and entomologists, who study insects. Discuss the types of scientists who study those fields such as meteorologists, seismologists, volcanologists, and geologists. It's one of the best places to find coloring pages for specific animals and transportation needs. The human body is fascinating and we will assess how it works. While you're studying animals and insects, discuss how the seasons—spring, summer, fall, and winter—affect them and their habitats. We look at the essential compound of life. In a typical textbook, you may find chapters from all branches of science, such as biology, chemistry, and physics. We look deep into the parts of cells. Always do the assigned reading and extra credit research. The study of life on this planet—and in the universe—is a topic worth delving into with your students. A look at the various vehicles we use to travel. The process that provides the mass of energy for all living things. Data collection is one of the fundamental processes in this subject area. The ocean, obviously! Have your kid find ocean animals with this word search worksheet. We take a look at some really cool critters that are in that big, blue mystery. We work on getting it right the first time. Work on the end of chapter problems The end-of-chapter problems are extremely crucial; you need to work on each and note how the question is presented to you. Examine animals that are rare in nature and often forced to be in captivity to allow the species to continue on. A look at the movement of the plates of the Earth.
